

SPECIALTY LIGHTING

Any actor will tell you that good lighting is everything.

Olsson Associates' specialty lighting professionals are dedicated to creating quality lighted environments that are sensitive to their surroundings and are easily maintained. Our designs meet rigorous criteria that ensure proper levels of glare, sky glow, and light trespass performance. These measures promote a visual setting that cost-effectively circumvents wasted energy (light pollution).

For Olsson Associates, specialty lighting means far more than generating designs for exterior systems. We want to enhance the impression and spatial character of the projects we light—whether it's a sports or recreational facility, a roadway, a parking area, or a pedestrian or bicycle path.

SPECIALTY LIGHTING | SERVICES

Lighting Design

- Parks and Recreation
- Sports Fields
- Pathways/Walkways
- Landscaping/Aesthetics
- Roadways/Bridges
- Parking Lots
- Environmentally Sensitive Designs

Lighting Studies

- Adequacy Assessments
- Outdoor Lighting Guidelines/Ordinances

Through specialty lighting design, Olsson Associates strives to provide a superior visual atmosphere where athletes play and pedestrians feel a sense of well-being. Roadways are visually safe, landscapes are complemented, and neighborhoods look warm and inviting.
